Software Engineer · Grails, Java & React

SUMMARY

Software engineer working across frontend, backend and system integrations. Builds healthcare software for the US market with Grails, Groovy and React at Cedar Gate Technologies, with unit tests in Jest and end-to-end tests in Playwright. Previously built payment, telecom and notification services in Java for the MOCO app at FocusOne Payment Solutions, and full-stack applications with Spring Boot and React.

SKILLS

Backend	Java, Python, Groovy, Grails, Spring Boot, Spring Security, Quarkus, Javalin
Frontend	React, Redux Toolkit, Redux Persist, JavaScript, HTML/CSS, Tailwind CSS
Data	MySQL, PostgreSQL, Hibernate/JPA, GORM
Integration	REST, SOAP, NATS.io, Firebase Cloud Messaging, Salesforce
Testing	Jest, Playwright
Workflow	Git, Postman, Agile/Scrum

EXPERIENCE

Software Engineer Apr 2026 – Present

Cedar Gate Technologies · Kathmandu, Nepal

- Build and maintain healthcare software for the US market on Operations Manager, an internal platform used by cross-functional teams.
- Develop backend services in Grails and Groovy on the JVM (Gradle) and frontend features in React with Redux Toolkit.
- Write unit tests with Jest and end-to-end tests with Playwright to keep releases stable.
- Deliver features, integrations and maintenance in an Agile/Scrum team.

Stack: Java, Groovy, Grails, GORM, React, Redux Toolkit, Salesforce, Jest, Playwright

Associate Software Engineer Jun 2024 · 11 months

FocusOne Payment Solutions · MOCO app

- Built the backend of the flight system: users book, pay for and cancel flights in the MOCO app, and operators follow every transaction in a web app.
- Built the telecom service for phone top-ups, data packs and phone bill payments.
- Built a NATS.io notification service that delivers SMS, email and push (FCM) messages to users and merchants.
- Developed REST and SOAP APIs with Javalin and Quarkus, and managed the MySQL databases behind them.

Stack: Java, Javalin, Quarkus, MySQL, NATS.io, FCM, REST, SOAP

Java Intern Feb 2024 – Apr 2024

Nepal Clearing House Limited (NCHL)

- Built three full-stack applications: an Employee Management System, a Bike Rental app and a Banking app.
- Developed Spring Boot backend services over PostgreSQL and React user interfaces.

Stack: Java, Spring Boot, PostgreSQL, React

Jr. Frontend Developer Jun 2023 – Dec 2023

SoAni Tech Nepal

- Built and maintained React features for the Eknepal news portal.
- Designed a static website for Sathi Bhai Nepal (NGO) and blog pages for Himalayan Blog Pages.
- Integrated the frontend with a Spring Boot and MySQL backend alongside the Java team, testing APIs with Postman; worked in Agile sprints.

Stack: React, Redux Toolkit, Postman

Frontend Developer Intern Mar 2022 – May 2022

SoAni Tech Nepal

- Built responsive React interfaces with Redux Toolkit and Redux Persist, and took part in sprint planning, stand-ups and retrospectives.
- Built a YouTube clone, an e-commerce site, a meeting scheduler and a weather app.

Stack: JavaScript, React, Redux Toolkit, Redux Persist, Tailwind CSS

PROJECTS

Bike Rental System · Spring Boot, Spring Security, React — Spring Security separates admins, who manage the bike fleet, from users, who browse and rent.
Second-Hand Car Price Prediction · Python — Reduces the randomness in preowned car prices, helping users buy preowned cars.
Banking App · Spring Boot, PostgreSQL — Transfers, deposits, withdrawals and transaction history across multiple accounts.
E-commerce Website · React, Redux Toolkit — Live product data from the Fakestore API, with listings, search, cart and checkout.

EDUCATION

BSc.CSIT, Prime College (77.45%) · NEB, Kathmandu Model College · SLC, Meridian International School
